

APPLICATION

Autoparts Industry

Cleaning carburetor, shock absorber, engine parts, piping, injection nozzle, circuit board, cutting machine tools etc

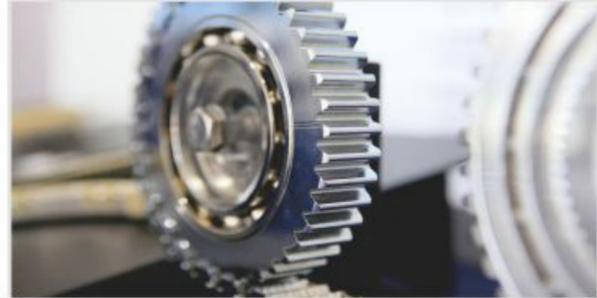

3C Industry

Components of electronic products, sensor parts, metal parts

Seiko Machinery

Cleaning oil from bearings, machine shafts, double-sides boards, electrostatic filter.

Surface Treatment

Cleaning dust, carbon deposition the surface of the product.

Precision Machinery

Clean stainless steel, copper and aluminum metal precision parts etc.

Plastic Industry

Cleaning plastic products and plastic mould.

Industrial Safety

Cleaning gas masks and smoke objects.

The Restaurant Industry

Cleaning oil and degrease from electrostatic filter, tableware and coffee machine parts.

Pneumatic Tools

Remove oil, grease and resin residue from the surface and gap of workpiece.

Optical and Glass

Cleaning optical devices, such as camera lens, mobile phone glass screen, TV glass screen.

The Pharmaceutical Industry

Cleaning metal filters and press tools

Aerospace Industry

Cleaning engine parts, precision parts.

PCB Board

Cleaning rosin, grease, mechanical chip

Medical Apparatus and Instruments

Wash the surgical equipment and clean the false limbs, implants and artificial joints.

Measuring Instrument

Cleaning oil, fingerprint and dust

Watches and Jewelry

Cleaning fingerprint, oil, dirt, dust from diamond, gold, silver, jewelry and gears.

Semiconductor Industry

Silicon wafer, semiconductor material.

Power Stations

Clean oil fume filter, decontamination, prevent blockage.
